

9<sup>th</sup> Sept 2009

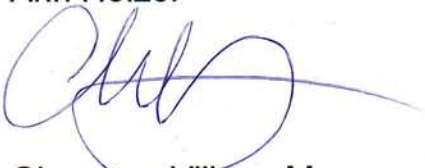

We have used JMF Plumbing Pty Limited for a wide variety of work within the Glenaeon Village. These works have ranged from general plumbing maintenance, installation of gas lines for residents, major sewer repairs involving road dig ups, through to a water conservation project.

The water conservation project required the replacement of outlet valves and other parts in the cisterns of some 160 resident units. The logistics of such a project can sometimes prove difficult when dealing with so many individual residents; however the JMF team completed the job in a very short time frame, with minimal disruption to residents, and without a single complaint.

The same can be said for the maintenance, major repairs and dig ups they have done for Glenaeon. The feedback from the residents has been nothing but positive. The tradesmen are well presented, courteous, polite and go about the work with minimal fuss. The combination of service, quality and competitive pricing makes JMF a great overall package.

JMF Plumbing is a very professional company, and I would recommend them without hesitation to anyone, be it a Retirement Village or an individual looking for a professional job.
